

## Final Project - Megan Tillotson

### Summary of Design Spec

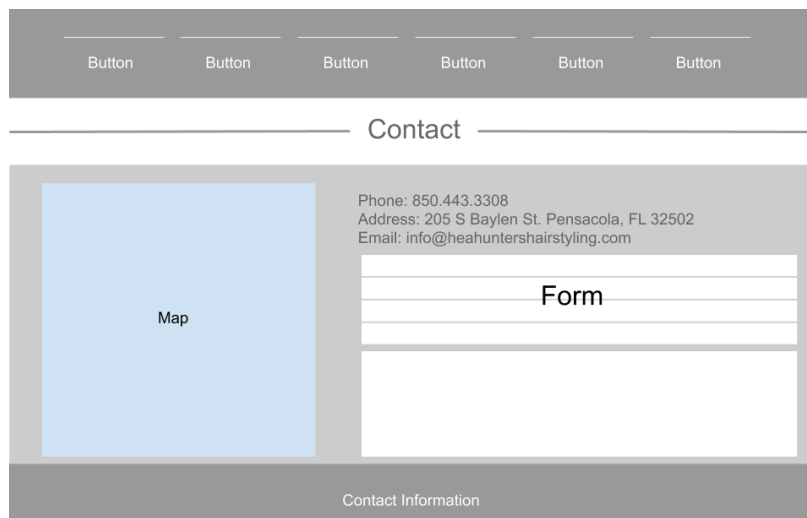

The site I've chosen, although it is mostly organized already, I would like to make more user-friendly in the sense that it is easy and simple to navigate in the main menu for new or returning clients. The tone of the site will be transformed into a modern and professional-looking space: minimal buttons and colors with focus points drawing the eye to important information on the page, with splashes of color coming from the actual photos of the hair salon. By creating a site that is easy to use for the viewer and appealing to the eye, this business will be able to flourish and potentially gain more high-end clientele from their website.
